SEMERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Blatt, Larry

APPLICANT: McSwiggen, Jim

TITLE OF INVENTION: Method and Reagent for Treatment of Cardiac Disease

FILE REPERENCE: MBHB00-864-A (400/006)

CURRENT APPLICATION NUMBER: US 60/169,100

PRIOR APPLICATION NUMBER: US 60/169,100

PRIOR FILING DATE: 1999-12-06

NUMBER OF SEQ ID NOS: 3897

Sequence 4246, Application US/10712672

Publication No. US20040102413A1

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Chowrira, Bharat
APPLICANT: McSwiggen, Jim
APPLICANT: McSwiggen, Jim
APPLICANT: McSwiggen, Jim
APPLICANT: McHood and Reagent for the Inhibition of Telomerase Enzyme
ITITE OF INVENTION: Whethod and Reagent for the Inhibition of Telomerase Enzyme
FILE REFERENCE: MBHB00-882-C (400/019)
CURRENT APPLICATION NUMBER: US/99/653,225
FRIOR APPLICATION NUMBER: 60/197,769
FRIOR FILING DATE: 2000-04-14
FRIOR APPLICATION NUMBER: 60/150,713

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 597, Application US/09479005A

| Sequence 597, Application US/09479005A
| Patent No. 6656731
| GENERAL INFORMATION:
| APPLICANT: Ribozyme Pharmaceuticals, Inc.
| TITLE OF INVENTION: Nucleic Acid Catalysts with Endonuclease Activity
| FILE REFRENCE: MBHB00-884-C
| CURRENT APPLICATION NUMBER: US/09/479,005A
| CURRENT FILING DATE: 1999-11-19
| PRIOR PILING DATE: 1998-11-19
| PRIOR FILING DATE: 1998-09-22
| PRIOR FILING DATE: 1998-09-22
| NUMBER OF SEQ ID NOS: 1208
| SOFTWARE: Patentin version 3.0
| SEQ ID NO 597
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    à
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 14200, Application US/09371772B

Sequence 14200, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Bacobedo, Dam
APPLICANT: Stinchcomb, Dam
APPLICANT: Stinchcomb, Dam
APPLICANT: Escobedo, Jaime
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Levels 06 Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: WHORER: US/09/371,772B
CURRENT FILING DATE: 1999-08-10
PRIOR PLILNG DATE: 1995-10-26
PRIOR PLILNG DATE: 1995-10-26
PRIOR FILING DATE: 1996-01-08
SOFTWARE: PatentIn version 3.0
SEQ ID NOS: 14225
SEQ ID NO 14200
LENGTH: 36
APPLICANT: McSwiggen, Jim
APPLICANT: Stinchcomb, Dan
APPLICANT: Stinchcomb, Dan
APPLICANT: Estinchcomb, Dan
